

FARM MANAGER

(and General Farm Worker)

Our Client is a large, (over 400 cows), progressive dairy farm in Co Down, running a pedigree Holstein herd with a herd average of over 8,500 litres. Feeding is all TMR, with cows being housed in modern accommodation and milked 3x/day through a high output parlour. A vacancy now exists for a progressive, enthusiastic **FARM MANAGER** to join the team and take responsibility for the day-to-day management.

The Role:

- Responsible to the owners for profitability of the farm
- Lead, manage and motivate the team of staff
- Management of the herd to improve performance

The Person:

- Possess a recognised qualification in agriculture or demonstrate suitable experience
- Demonstrate a proven track record in farm management (preferably dairy)
- Be willing to have a hands-on approach and lead by example

With the objective to grow and develop the farm, this key, managerial role is vital for future success. A modern house is available and a rota is operated for time off. The negotiable remuneration package will not be a hindrance for the right person. If you feel you have the necessary qualifications and experience and can meet the challenge, please contact us for a Personal History form.

The farm also requires a **General Farm Worker**, with experience in stock handling and tractor work. Preference will be given to candidates with milking experience. Please write to the address below, enclosing a CV, giving details of experience and current salary.
